

Chevron Energy Sources Colloquium for High School Science Teachers @ USC

July 15 - July 17, 2019

The colloquium is designed to allow high school science teachers a unique opportunity to participate in an enriching experience before the start of the new school year. The colloquium focuses on the most important issues related to the science and technology behind providing energy resources in this country and to the world community.

The program is intended to provide science teachers a chance to explore this subject deeply and with a diverse group of academic and industry professionals. The program will include seminar style discussions, laboratory visits and outings.

Topics will include:

- Grand challenges in meeting growing the energy demand and energy requirements for clean water resources
- Various sources of Energy and the associated economics
- Environmental aspects and potential solutions

Deadline to apply: 12 PM PDT May 1st, 2019

Those selected will be provided with room and board, meals, and a stipend.

CE credit will also provided to the participants who complete the colloquium.

To apply, the attached form needs to be filled out and submitted by the due date to: Sorin Marghitoiu at marghito@usc.edu
