Science Fair Presentation
07/24/19
Science Fair

1. Ask your science teacher at school, who your site coordinator is for the LA county fair.

2. If your project involves hazardous or biological material, or involves research with animal or human subjects, the work needs to be preapproved by the scientific review committee.

3. There is significant prize money involved in winning the fair in your category.

4. If you win at the county fair, you can go on to the state fair and the international science fair
